SUMMARY OF QUALIFICATIONS

- Final-year Computer Engineering student with a strong foundation in software development and web technologies.
- Proficient in modern frameworks and tools, including React, PostgreSQL, and TailwindCSS.
- Demonstrated problem-solving skills, adaptability, and a collaborative approach in academic and professional settings.

EDUCATION

Government Engineering College, Gandhinagar
Bachelor of Engineering, Computer Engineering

Gujarat, India
CGPA 7.43

RELEVANT COURSEWORK

Software Engineering, Data Structures, Object Orientated Programming, Database Management

TECHNICAL SKILLS

Programming Languages: Python, Javascript, SQL, Java

Web Technologies: HTML, CSS, React, TailwindCSS, NodeJS, ExpressJS,

Database & Tools: MongoDB, SQL, Vercel, Vite, Git & GitHub

Softwares: VSCode, Postman, PgAdmin

EXPERIENCE

TatvaSoft, Summer Internship | [Link](#)

June 2024 - July 2024

- Completed a summer internship program with consistency, hard work, and accountability in all tasks.
- Accomplished the Virtual Community Support Project successfully.
- Developed skills in .NET, PostgreSQL, and Angular Framework.
- Developed various APIs for different entities to perform CRUD operations on a database.

RECENT PROJECTS

NPM Packages | [Link](#) | [Link](#)

React, TypeScript, Rollup, Nodejs

- Developed reusable React components: "Scroll to Top" and "Scroll to Next" buttons.
- Ensured lightweight design for minimal performance impact.

Virtual Community Support | [Link](#)

.NET, PostgreSQL, Angular

- Virtual Community Support is a web-based application designed for managing missions and the skills needed for them. Administrators have the capability to create and oversee missions, while users can submit applications for participation. The platform incorporates role-based authorization to effectively manage access for both users and administrators.

Job-Nodes | [Link](#)

React, TailwindCSS, Vite, DrizzleORM, Vercel

- JobNodes is an innovative online community platform where users share job search tips, career advice, and workplace experiences. The most helpful posts are upvoted by the community.
- Implemented user posting and upvoting with DrizzleORM for database management, Vite for optimized builds, and TailwindCSS for responsive design.
